These courses are included in the Home Economics Education diploma, and may be taken independently for credit.

Health Education
EDCP 326/96A  |  July 8–12

This course is an introduction to health education, which will introduce, and help students gain a greater understanding of health education today.

Emphasis will be given to identifying what constitutes health education, historical and contemporary approaches to health education, forces that influence health education, current curriculum initiatives related to health education, and pedagogical approaches appropriate for health education.

Ecology of Food Studies
EDCP 495E/96A   |  July 15–19

This course is designed to prepare students for teaching food studies at the middle and secondary level. Drawing from a variety of readings, group discussion and hands-on learning experiences, we will explore the practical aspects of teaching foods, as well as contemporary themes, including how to infuse an ecological perspective into our pedagogy.

Registration Deadline: Monday, June 3
