

MEd

Science Education

The study of innovative strategies for teaching and learning Science with/in community of Science education colleagues

Fully online, part-time cohort

Application Deadline | March 2, 2020

Program Start date | September 2020

MEd in Science Education

The Master of Education in Science Education is ideal for educators with a science background or an interest in science across any part of British Columbia and elsewhere. This includes:

- Secondary and elementary science teachers
- Early Childhood educators
- Post-secondary science instructors
- Science educators in informal settings
- Educators interested in science education

This graduate program offers students the opportunity to pursue a wide range of research and professional interests in the sciences and STEM education fields.

Through the pursuit of student individual and collective interests, graduate students will develop and enhance their knowledge of science teaching and learning, further advance the quality of their professional practice, and be ready to assume leadership roles in the field.
